Clean Cups	10
Overall	8.0
Total	84.0

*Scoring pattern adopted from SCAA method

D. SPIDER CHART FOR THE COFFEE:

Observations:

1. The preparation of lot is decent
2. The visual appearance of the coffee is Greyish Green.
3. The beans size is medium to Medium bold. The shape of the beans is roundish
4. The coffee has Medium to Medium+ Softness and Smoothness.
5. The intensity of flavours are Medium to Medium+

Suggestion:

1. The cup might further improve with better fruit selection and post harvesting process.
2. BRIX reading with above 20 will give more sweetness and brightness to the cup and will shoot the score up
3. Using 80/90% above ripened fruits will improve the overall quality of the coffee.

Roasting Suggestion:

1. The roasting of the coffee should be Medium+ to extract the best flavours and characters out of the coffee.
2. Ideally it should be pulled out just at the beginning of the second crack.
3. The Charge temperature should be 185-190 degrees.
